

Croydon Creek Nature Center

Spring Festival & Native Plant Sale

Saturday, April 28, 2012 • 1 to 4 p.m.

Plant sale pre-order deadline April 13, 2012 • Pick-up orders April 28, 2012, from 1 to 4 p.m.

Why use native plants? Native plants are adapted to local weather and soil environments. These plants allow homeowners to add beauty to their landscape while preserving natural heritage and providing habitat and food for area wildlife, including a variety of bird and insect species. Additionally, native plants require less long-term maintenance compared to exotic ornamental species.

Native Plant Descriptions

Black-eyed Susan: Golden yellow blooms last July to October providing seed for birds and nectar for butterflies. Height: 2 to 2 ½ feet. Exposure: full or partial sun.

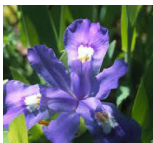

Stonecrop: A succulent and low growing native that is a great groundcover for shady areas. Height: 6 inches. Exposure: shade to partial sun.

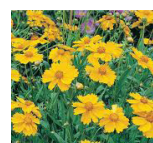

Turtlehead: Light green foliage topped by spikes of cream colored flowers mark this late summer bloom. Attracts native butterflies. Height: 2 to 4 feet. Exposure: partial shade.

Purple Coneflower: Drought tolerant species that is a great butterfly and bird magnet. Flowers July through August. Height: 2 to 3 feet. Exposure: full sun.

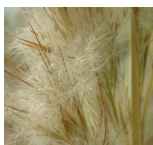

Crested Iris: A low growing fast spreading plant with pale blue to violet flowers. Best grown in partial shade. Height: up to 10 in. Exposure: full sun to partial shade.

Tickseed: Pale pink blooms and a fast-spreading habit form a dense groundcover that is attractive to butterflies. Height: 1-3 ft. Exposure: full to partial sun.

Butterflyweed: A drought tolerant native that is like a magnet for Monarch butterflies. Bright orange flowers bloom throughout summer. Height: 18 to 24 inches. Exposure: full sun.

Broomsedge: This easy growing grass does well in poor soils and helps to stabilize the soil. Turns a golden amber in the fall. Height: 2 to 3 feet. Exposure: partial or full sun.
